## JUMBO TWIN STAGE FILTRATION

The CEG Eco-Pure Duplex Entire home All-in-One filtration system is a Mains water, twin filter system that is designed to reduce chlorine, sediment, taste, odour and chemicals in your water providing safe and healthy, great-tasting water to you and your family.

This system operates a low-pressure drop which is beneficial when multiple taps are being used concurrently throughout the day. It is fitted with a pressure gauge that helps indicate when it is time to replace cartridges. Maintaining the long-life cartridges will extend the life of your household appliances, while giving clarity to water and sediment-free filtration.

The CEG Eco-Pure duplex system is designed specifically for Mains water and has a modern appearance with a functional bracket making for quick and easy installation. The system does not require power to operate and is a low-maintenance, system that requires minimal ongoing interaction. Simply replace the cartridges as recommended by the manufacturer, or when taste and odour returns and enjoy reliable, economical and healthy water throughout your home.

The Poly pleated and Block activated Carbon cartridges reduce taste and odour to water that can often be found in Mains or town supplies allowing you and your family to enjoy the natural and pure taste of water.

**>> STAGE 1**  
20 Micron Poly Pleated

**>> STAGE 2**  
5 Micron Activated Carbon

 **DOUBLE O-RING**  
Design

 Complete with **BRASS INSERTS**

\*Warranty Excludes Cartridges

Weather resistant, aluminium powder coated bracket  
Two precision mounting points at 200mm centers for quick and easy installation.

25mm threaded inlet connection with brass inserts that ensure durability and product longevity.

Two 20" jumbo housings with double 'O-rings' for greater flow capacity in order to remove an extensive range of sediments, tastes, odours and chemicals.

**Stage 1:** Coarse Sediment Filtration.  
20 micron Poly Pleated cartridge removes sand, silt, dirt and rust particles and has up to 7 times more holding capacity than traditional filters

### Stage 1

#### ECO-PURE POLY PLEATED 20 micron cartridge

Designed to remove sand, silt, dirt and rust particles from drinking water. These elements have up to 7 times more holding capacity than traditional poly spun cartridges. Suitable for repeated re-use by simply washing in warm soapy water.

- High flow rates improving water pressure and flow
- High dirt holding capacity lengthens cleaning intervals
- Pre-treatment for block activated carbon cartridges

Pressure gauge enclosed in a stainless steel casing and is liquid filled and is suitable for the harshest weather conditions  
Air bleed valve for releasing trapped air in the filter housing.

25mm threaded outlet connection with brass inserts that ensure durability and product longevity.

**Stage 2:** Fine Sediment Filtration.  
5 micron Block activated carbon cartridge which reduces bad taste, odour, chlorine and heavy metals while improving clarity.

### Stage 2

#### ECO-PURE BLOCK ACTIVATED CARBON 5 micron cartridge

Designed to reduce unpleasant taste and odours as well as removing fine sediment. This design makes it an excellent filter for removing contaminants to ultimately produce cleaner, clearer and simply better tasting water.

- Reduces:
- Bad Taste and Odour
  - Chlorine
  - Pesticides and Agricultural Sprays
  - Heavy Metals such as Lead

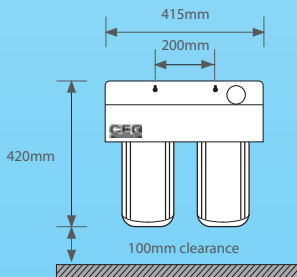

**CARTRIDGES INCLUDED**  
Replace cartridges every 3-6 months with genuine Eco-Pure cartridges.

## >> 20" DUPLEX MAINS Product Code #5570270000

### PRODUCT DIMENSIONS

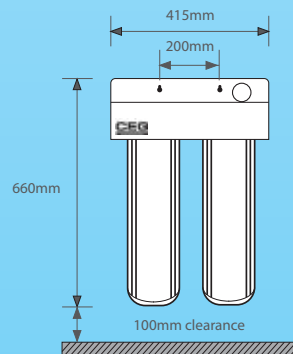

#### SPECIFICATIONS:

Max. Working Flow	35 LPM
Min. Working Pressure	2 bar (200kPa)
Max. Working Pressure	8 bar (800kPa)
Max. Working Temp Range	5°C - 45°C
Inlet Size	25mm (1" BSP)
Outlet Size	25mm (1" BSP)

#### PRODUCT CODES:

Stage 1		
Poly Pleated Cartridge 10" Jumbo	20 Micron	#5572050000
Stage 2		
Block Activated Carbon Cartridge 10" Jumbo	5 Micron	#5572220000

### PRODUCT DIMENSIONS

#### SPECIFICATIONS:

Max. Working Flow	70 LPM
Min. Working Pressure	2 bar (200kPa)
Max. Working Pressure	8 bar (800kPa)
Max. Working Temp Range	5°C - 45°C
Inlet Size	25mm (1" BSP)
Outlet Size	25mm (1" BSP)
